VF-108 XTC CEILING SPEAKER

The VF-108 XTC is an advanced rimless ceiling speaker designed to provide exceptional mid-high frequency performance in architectural audio systems. Featuring an 8-inch Vero driver with a 2-inch voice coil, it offers 150W AES and 600W peak power for clear, detailed sound. Its 135° wide dispersion ensures broad coverage, while the slot porting minimizes turbulence at high SPL levels.

Built with durable materials, the VF-108 XTC includes an impact-resistant ABS housing with UV stabilizers, available in silver and white finishes. Its quick-fit recess locking mechanism and fully sealed enclosure make installation seamless and enhance bass response. With support for 100V/70V transformer taps and optional pendant mounting accessories, this speaker is versatile for flush-mount or pendant-style setups.
